## Technical requirements of STM-Holding, LLC for the quality of ferrous metal scrap

COMPOSITION	CONTAMINATION	DIMENSIONS AND WEIGHT
	S	Sized steel scrap - 3A
Lump scrap and scrap	1.5% by weight	1. The size of the piece is no more than 1200x800x500 mm.
waste		2. The thickness of the metal must be at least 1 mm.
	1	3. Pipes with a diameter of more than 150 mm must be flattened or
		cut along the forming line.
	Sized	steel scrap – 3A railway
Railtracks, wheelsets, side		1. Railtracks up to 2.5 meters;
frames, bolsters	listo of weight	2. Cut wheel sets,
frames, boisters	Price of 3A	3. Side frames, bolsters
		teel scrap and waste – 4A
Small lump scraps,	5-10% by weight	1. The size of a piece should not exceed 200x150x100 mm.
splintery scrap	105 or 200000 H	2. The thickness of metal must be at least 3 mm.
	Price of 3A	3. Scraps must not identify as belonging to missiles
	Off-size	steel scrap and waste - 5A
Lump scrap and waste,	2.5% - 2.7% by weight	1 771
cast iron.		1. The size of a part larger than the one specified in 3A category.
	-1 200 rubles from the	2. The thickness of metal must be at least 1 mm. The mass of the
	price of 3A	piece is not more than 1.5 tons.
For the regions	-700 rubles from the price of	3. Whole cast iron battery groups
i or the regions	3A	
	Off-size steel	scrap and waste - 5A railway
Railtracks, wheelsets	2.5% by weight	1. Railtracks more than 2.5 meters long;
, , , , , , , , , , , , , , , , , , , ,	-250 rubles for 3A	2. Whole wheelsets.
		steel scrap and waste - 5A2
Lump scrap and waste, cast	5% by weight	1. The size of a part larger than the one specified in 3A category.
iron.	,	2. The thickness of metal must be at least 4 mm. The mass of a piece from
50-200 (200)	-2500 rubles from the pric	e 1.5 to 5 tons.
	of 3A	
		Baled scrap - 8A
	3% - 3.2% by weight	1. The size of bags is not more than 800x500x500 mm, the thickness of the

The size of a piece is less than 1200x800x500 mm.

Steel, sheet scrap, lightweigh and household scrap, tin	t 2.5% - 2.8 % by weight -1 500 rubles from the price of 3A	1. The size of a piece is at least 1200x800x500 mm, but not more than 3500x2500x1000 mm.  2. Metal thickness less than 1 mm.			
Steel ropes and wire - 13A					
Steel ropes and wire	5% by weight (pieces) 10% (roll)	<ol> <li>The diameter of a roll should not be more than 1000 mm, and the length not more than 500 mm.</li> <li>Pieces of rope with the diameter of not less than 20 mm and the length of</li> </ol>			
	-1 300 from the price of 3A	not more than 1200 mm.			

	9	Steel turnings – 16A
Curly steel turnings	7 - 30% by weight	1. The turnings should not be burnt or rusted, mixed with soil or clay. It is not allowed to have small or crushed turnings.
	-5000 rubles from the price of 3A	2
	Cast iron	1 scrap and waste - 17A
Cast iron scrap and waste	2% by weight - 350 rubles from the price of 3A	<ol> <li>The size of the piece is no more than 1200x800x500 mm.</li> <li>The thickness of the metal must be at least 1 mm.</li> </ol>

Baled metal turnings - 23A

Cast iron briquettes	2% -50% by weight	Dimensions are not regulated. The weight of briquettes must be at least
	- 3000 rubles from the	2 kg, but not more than 20 kg
	price of 3A

Appendix to the Technical requirements dd. 26.07.2016

## Garbage:

1. Car bodies with interior parts are accepted as garbage!

- 2. If the bag (8A, 8B, 9A) contains: uncleaned refrigerators, bricks and stones, the entire bag is accepted as garbage!
- 3. Non-magnetized scraps excluding the category 17A are accepted as per agreed.
- 4. Each refrigerator or boiler not cleared of foam plastic and plastic materials will be accepted as garbage 100 kg.

## Fines:

- 1. We do not accept whole or fragments of bombs, shells, mines, shell casings and other explosive objects. The fine for one such unit or fragment starts from 100,000 rubles.
- 2. We do not accept entire closed containers: cylinders, fire extinguishers, receivers, hydraulic cylinders, carracks and shock absorbers, as well as other closed containers. In case of detection of such items the supplier is fined from 500 rubles to 5,000 rubles per unit.
- 3. Vessels of all types and sizes (cylinders, barrels, etc.) and all hollow objects (engine cylinders, etc.) must be cleared of the contents (and in winter of ice and snow) and accessible for inspection of the inner surface; the bottoms of barrels and other containers must be cut along the rim.
- 4. In case of detection of canisters containing ammonia, chlorine, freon and other gases dangerous to health and environment a penalty in the amount of up to 50 000 rubles is charged.

## Other scrap:

1. Car bodies are fully received as category 5A2.
