

Technical requirements for receiving non-ferrous scrap

1. All metal is accepted minus the actual contamination (oil, paint, oxide, plastic, dirt, iron, other inclusions, etc.)
2. Material with contamination is received at a percentage of 5% to 30 %, if the contamination exceeds 30%, the price of such material is negotiable.
3. Products containing non-ferrous metals, in which the amount of ferrous metal exceeds 30%, are received for being knocked-down at the contract price, taking into account the cost of cutting.

Metal

Note

Copper	Contamination 1%,
Bronze, brass	Contamination 1%,
Car radiator, brass	Contamination 5%
Car radiator, aluminum	Contamination 45%,
Cunifer	Contamination 2%
Aluminum and aluminum alloys	Contamination 4%
Aluminum (Aluminum-magnesium)	Contamination 4%
Aluminum can	Contamination 25%
Zinc and zinc alloys	Contamination 1%
Lead	Contamination 1%
Plastic case batteries	Contamination 1%
Ebonite case batteries	Contamination 1%
Titanium alloys	Contamination 2%
Stainless Steel	Contamination 2%
